ALLIES CONFER ON 'AFFAIRS IN GREECE

Event of the Former Greek

Special cable to The Christian Science Monitor from its European News Office LONDON, England (Friday) - The allied conference commenced at 4 most competent of my assistants—we trine of the Far East is called falgues, the French Premier, Philip Government departs from my policy, versity and assistant director of the French Foreign Office, Paul Cambon, tell what they did, and what they the French Ambassador in London, might have done, and thus they will Hodges says, "and that is based on French Embassy. Mr. Lloyd George, Lord Curzon and Sir Maurice Hankey represent Great Britain. Today's conference, The Christian Science Monitor is informed in authoritative quarters, will be of an informal and reliminary character, the general Sforza, the Foreign Minister has left iscussion taking place on Sunday. for London, while John Giolitti, the t is expected that as John Giolitti, he Italian Premier, has indicated his y to be present, Count Sforza hat he will arrive on Sunday morning the basic rule of allowing absolute in time for the conference.

Greece's Trading Position

As already stated, the general object of the meeting is to deal with the Greek crisis and to decide on the ttitude to be taken by the Allies in the event of former King Constantine returning to the Greek throne. As to the report that George Rhallis, the new Greek Premier, will join the conce in London, The Christian Science Monitor is informed that this a contingent on the Allies' decision.

The importance of the Greek quesn cannot be overestimated, when it nsidered in conjunction with the ratified treaty of Sèvres and with he fact that Greece is the point of conuence of the two great branches of de which meet in the Levant, one ning from the Black Sea with prodof the South Russian wheat fields, nd the other through the Suez canal m the Far East.

The allied policy toward Russia, The throne. cill also be discussed, but it is not court ENJOINS vill participate in the trade agreement emplated by Great Britain.

Russian trade agreement with

ain has now received the finishing hes by the Board of Trade and will nd probably put before the House of ommons simultaneously.

As to the German reparations, this estion will be barely touched upon France and Britain are in agreet regarding this matter and will wait the result of the Brussels conce, where the Germans will meet ne allied financial experts. Mr. Leyies and his party arrived last night

Italian Delegate Departs

Special cable to The Christian Science Monitor from its European News Office ROME, Italy (Friday)-The "Tribuna" announces that Count Charles Premier, remains in Italy. Writing on the subject of the new interallied conference the "Tribuna" declares Il take his place and it is hoped that the Italian policy is dictated by liberty to the Greek people to setfle their own interior affairs and to place Turkey in such a position that she will be able to live.

Greeks to Vote on Dynasty

ATHENS, Greece (Wednesday)-The reasons for holding a plebiscite in Greece on December 5, with regard to the return of former King Constantine to the throne, are given in the Cabinet's proclamation of the plebiscite, made public today. This says:

"By the elections, the Greek people expressed their will clearly on the question of the dynasty to those who had cast doubt upon the rights of Constantine, but a plebiscite will be held so that the people may again empha-size their will and in order to show that the throne obeys its motto: Mx strength lies in the people's love. Therefore a secret vote will be held on December 5, authorizing the government to beg the King to return to the

GERMAN CONCERN OVER PLEBISCITE

Without Upper Silesia, It Is Said, Germany Cannot Carry Out the Peace Treaty Terms

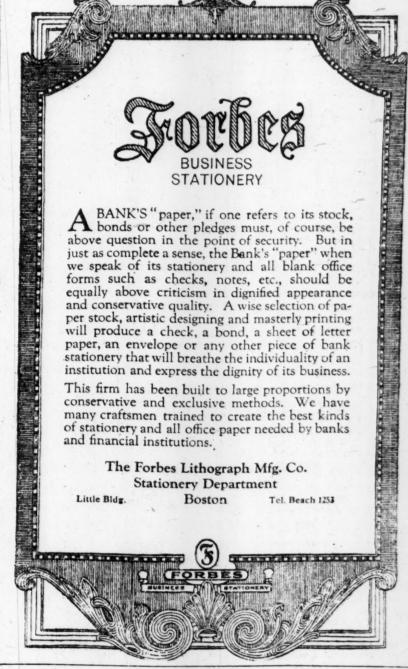

Special cable to The Christian Science BERLIN, Germany (Thursday) -

ring self-government on Upper Silesia. stantine Fehrenbach, in the course of his speech, said that perhaps the plebiscite would take place in January and that its result would be of im portance for Germany. "Without Upper Silesia," said the Chancellor, amid the applause of the whole House, including the extreme Socialists, "and without the vast coal reserves it contains. Germany cannot hope either to carry out the terms of the Peace Treaty or even to continue to exist.

The Chancellor denounced the meth ods of terrorism, which included even murder, which he said the Poles were using in order to compel the popula tion there to vote for a union with Poland. Other deputies insisted on the vital significance of the possession of Upper Silesia to Germany and the hope was expressed that the Allies would not allow any coercion of voters, when the plebiscite is being held.

ENVOY OF MEXICO HAS COLBY LETTER

Document He Bears to President de la Huerta Said to Contain Position of the United States

Special to The Christian Science Monitor from its Washington News Office WASHINGTON, District of Columbia Roberto V. Pesqueira, the special that effect has been reached by the agent of the Mexican Government in

of the Interior, and was made known ton for Mexico City with a letter that yesterday in a letter from Cato Sells, has been given him by Bainbridge Commissioner, and approved by John Colby, Secretary of State, and which Mr. Pesqueira will hand to Provisional President de la Huerta before the latter relinquishes office on the last day of this month. Prior to his departure from Wash-

ington, Mr. Pesqueira, it was learned, sought to give the impression that he had "won the fight" for recognition, and that the document he was bearing to President de la Huerta was confirmatory of the impression he sought to create. All that is known here is that Secretary Colby did address a letter to the Mexican special envoy, but every recent incident that has a bearing on the question of recognition tends to discredit the impression that Mr. Pesqueira sought to create.

Officials of the State Department would not comment on the letter that Secretary of State Colby had given the Mexican special agent. It was ber of acres any lessee may acquire, taken for granted that, if recogniby lease or assignment, for oil-mining tion had been extended, Mr. Colby would not seek to conceal the fact.

LOW COST OUTING RESORT SOUGHT

Find Vacations Too Expensive -Cerro Bruja Mountain

By special correspondent of The Christian

PANAMA, Republic of Panama-Canal zone people are agitating the question of cheaper vacations. They have spent about \$25,000,000 on their annual "leaves" since the construction of the canal began. They are entitled to a month every year and to the two weeks needed to get them to and from "the states" where they are supposed to spend that month.

The expense of going so far has always been a heavy one, especially on those with families, who constitute about one-third of the whole force. It has meant great difficulty to save anything out of their wages, and has ention, and he will be particularly caused many to forego the trip and to spend the month on the Isthmus.

With the high cost of living of late and the prospect of a possible fall in wages before long, officials and employees are trying to find places where cooler weather may be enjoyed. Unfortunately it costs as much to get to any of the mountain resorts in Panama, Costa Rica, or Colombia, as to reach New York, under present transportatio. arrangements.

Although the Chiriqui region in Panama rises to an altitude of 9000 feet, with large plateaus not much lower, and is only a few hundred miles from the canal, there is neither road nor railroad to it. The fare on the small and uncomfortable steamers plying between Panama and David. in Chiriqui Province, is not less than the employee rate on the Panama line to New York.

Curiously enough, there is a high mountain not more than 12 miles, in a straight line, from the canal, whose possibilities in the way of cooler climate have been neglected from the Americans.

The view from Cerro Bruja is magof its length, with the cities and towns the gold to be counted. He had only the time he was in swaddling clothes. along the way, and both oceans may got \$160, but he was none the wiser Albertico replied in the affirmative be discerned from a properly chosen and quite content. Annual After-Thanksgiving

Markdown Sale

A Three Day Sale Beginning Today

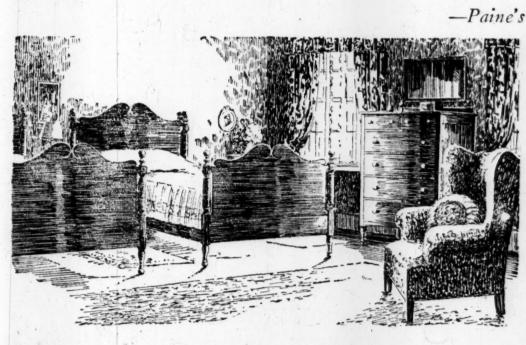

N DECEMBER 26th we usually hold our greatest sale of the year-greatest in the number of customers served, volume of sales and number of special values. This year we are moving the sale forward a month. For a three-day sale, beginning today, we are offering values as good as those usually offered December 26th. Deflation has begun here. It began last April. It continued throughout the Summer. It is still going on. Our increases in the last eight months have been gratifying evidence of our customers' appreciation of our efforts.

E BELIEVE that there is no store in the United States in which the stock of merchandise is cleaner and fresher than ours. This After-Thanksgiving Sale will be a fresh effort to increase business still further and to hasten the process of deflation to a basis of comparative stability. The values are here in abundance. The machinery for showing it and distributing it is ready. When we opened this morning we had bargains to justify our hope of one of the largest days in our mercantile life of fiftythree years.

room for expansion, are looking world.

In the direction of her shores.

The Common world realizes that her geographical position in the heart of the Pacific may become more embarrassing unless she fills her empty spaces. That this is correctly 71 years, and at the end of 1858 it glad to say that for the first time The Commonwealth realizes that ated may be gathered from the fact that Percy Hunter has been asked by Mr. Hughes, Prime Minister of Australia, to initiate in London a comprehensive scheme of immigration embracing the entire Commonwealth.

A Great Mission

Mr. Hunter has now arrived in London to carry out his great mission as Director of Immigration for Aus-He is an Australian and has had a notable career. He is essentially a man for big work, and peopling a continent does not dismay him. He has devoted much of his time and energies to immigra-tion work. He succeeded in amalcamating the New South Wales and Victorian systems, but the war representative for Australia of the

Upon being asked by a representative of The Christian Science Monitor the would say anything on the subject of his mission and the peopling of Australia, Mr. Hunter said: "In point of population Australia stands today where America stood immediately after the War of Independence, and a holf This is roughly a century and a half ago, and at that date the settlement Australia v. Canada of Australia was absolutely in swaddling clothes. Today, as the growth

in the world, the natural corollary will due clashing will be avoided." follow that it could contain equally The New Bureau

the population of those countries."

Mr. Hunter declared that already the Australians, partly by reason of the practical vigor of their advanced political ideas, had achieved for their working-classes more comfortable conditions, and a higher partment is likely to have a profound Sweden's forestry from the purely exstandard of living than those of almost any other working people on the face of the globe. It was the ambition of the Australian people that these conditions should in no way be modified, except for their improve-ment. This idea was at the back of the White Australia doctrine, of which so much had been heard on both sides of the world. It rendered the execution of a vigorous immigration policy not only a desirable factor, but an absolute essential to the life of the

Filling Vacant Spaces

With the teeming millions of Asia and the Malay Archipelago in close proximity to their sparsely peopled and inviting territories, and with all the work of national development practically before them, Mr. Hunter said that it was not to be wondered

Special to The Christian Science Monitor their undeveloped country held. It had been frequently stated in terms peace problem the British Empire of reproach that practically half the has to face today is that of the movement of her surplus people. Former true, but Mr. Hunter pointed out that the Australian cities were not over-the dominions, and the dominions are conwarded and in the European server.

At this stage Mr. Hunter was asked if he anticipated any danger from the Asiatic races, uncomfortably near true, but Mr. Hunter pointed out that the Australian cities were not over-the dominions, and the dominions are conwarded and in the European server. dominions and the dominions are crowded, and, in the European sense, eager for an invasion of their own never could be, as they had such abundith and kin, to develop their lands dant spaces around them, and that and to hold them. Australia in par- they could never develop into the overicular is awakening to the fact that crowded urban areas such as were to intold millions of Asiatics, who want be found in all great cities of the old

reached 1,050,828. Several reasons may be attributed for this eminently satisfactory state of affairs. The depression in Great Britain after the Napoleonic wars, the discovery of gold in Australia, the introduction of sheep, satisfactory exploration work, all helped to encourage immigration. In one sense today history repeats itself. The conditions in Europe are such that vast numbers are anxious to settle in other lands, and the journey to Australia today is a luxurious pleasure, compared with the hardships borne by the early settlers.

The Director of Immigration was next asked if Canada's accessibility might not militate somewhat against the success of Australia's efforts on stopped operations. It is owing to his initiation that Australia has now one immigration policy. Mr. Hunter has studied the movements of popuwe have always had to face, the treation in the United States of America mendous attractions of Canada. The and Canada, and has carried out sev- fact that they are within half a dozen eral important government missions days steaming of England, the fact that the fares are comparatively low, well, is vice-president and honorary and that, if they do not like the new country, they can return without ruin-Pan-Pacific Union, and was one of ous expense or without great loss of the founders of the Millions Club in time—these have always made Canaous expense or without great loss of da a very formidable competitor of Australia, appealing powerfully to the Britisher who is thinking of transplanting his home. This but emphasizes the necessity for the continuity of the Australian policy, for every break damages the cause, and puts

gated this century. At this stage Mr. Hunter was asked neighbors are extremely cordial, but Australians cannot blind themselves to the fact that they cannot continue to occupy a huge country which has been handed to us as a trust by the British Empire, unless we effectively settle it, and it is for this reason that the Prime Minister of Australia set on foot the present 71 years, and at the end of 1858 it glad to say that for the first time in the history of the British Empire we have now secured in this vital imperial task the cooperation of the

home government.

"With the help of the British Government," the director concluded, "the cooperation of the British people, and a steadfast determination on the part of the Australians themselves, I am optimistic enough to believe that we shall establish a flow of population to our shores which will increase rather than diminish as the years go on, and which, in the course of a comparatively short time, will provide our continent with that measure of population which thinking people feel is a minimum for what might be termed safe occupation."

SWEDISH FORESTRY HIGHLY DEVELOPED

Special to The Christian Science Monitor STOCKHOLM, Sweden-In comparatively recent years forestry and its alled industries have replaced mining as the "chief living resources" of Sweden, and her position among the other timber-producing countries has been strengthened as a result of the war. Russia, who up to 1914 was her most important competitor in the export value of forest products, will be, it is confidently believed, unable to challenge Swedish supremacy in this respect for many years to come.

From the Gulf of Bothnia to the mountain of birch forest in the north, two-thirds of the total area of Sweden forms a single continuous belt of coniferous forests, consisting chiefly of white and red pine, fir and spruce, all of excellent quality. This practically inexhaustible supply of timber would not of itself be sufficient to create the

LONDON'S PARADE OF UNEMPLOYED

her, and a supreme national aspiration First Big Unemployed Demontration in Seven Years Proves to Be Disorderly Affair

Special to The Christian Science Monitor LONDON, England - Disorderly from their homes, they should feel scenes in Downing Street and Whiteployed, some 30,000 of these having previously gathered on the Thames Embankment in order to accompany ous London boroughs who waited on

It was while this conference was being held and the Premier and the mayors were doing their best to solve the problems of unemployment that the more rowdy element of the throng were noticed to be spoiling for a fight, though there was no need or provocation for violence whatever. After the huge procession had marched from the Embankment to Whitehall, what at first appeared to be an entirely good-LONDON, England-The Prince of humored attempt to gain an entry

Police Resistance

The police were compelled to reof demonstrators who were ranged on top of it and behind it. These fell stated that the government was fully plained, it has been the policy of the into the building area, several being Commonwealth Government in London injured. This apparently precipitated matters for the front line of demoneign office is used, that is to say, apart strators then picked up coping stones given by the government, but by and hurled them at the police. Though | municipalities, private people, everyties, the building lends itself to the this appeared to be the signal for a general attack, the police did not re- deemed. It was in that spirit that a sort to their batons. Mounted and foot cabinet committee had been appointed police reenforcements were, however, hurried up. Just before the mounted schemes had been formulated. These police arrived, a young man commandeered a white hores in the vicinity of Northumberland Avenue and, riding areback, made his way along early date. to Whitehall, rode past the cenotaph then, turning his horse, charged back to Downing Street. The crowd stampeded and he reached the cordon of police. Here he was quickly unhorsed By special correspondent of The Christian and taken into custody.

The deputation of mayors had althe more violent disturbances took ing over to the United States Governplace. The demonstrators from Tottenham and Poplar district, with red by the Secretary of the Interior, the flags flying, approached the cordon of great Kau desert on the Island of police, singing the "Red Flag." · NASH FULR

\$1395 with Cord Tires f. o. b. factory

The new Nash Four, a product of expert engineering and expert manufacture, is now shown for your inspection.

It is a quality motor car, light in weight but strongly and finely built to endure the hardest service.

Like the Nash Six, it has two conspicuous and outstanding features—unusual power, due to its Nash Perfected Valve-in-Head Motor, and really exceptional beauty of design and finish.

The character of the Nash Four may be judged not only by sturdy excellence of construction but in the fineness of the many important details which make for superior comfort and convenience.

We will welcome the opportunity to show you the Nash Four at your earliest convenience.

> At the present time all of these tralized banking organization and a more elastic credit system and prices here have advanced relatively less than in Europe. Wages, furthermore, have advanced on the whole as rapidly as prices, which was not the case during the Civil War.

With these reservations in view it may be noted that during the Civil War prices as compared to 1860 rose to a higher point than did prices during the World War as compared to 1913. After the Civil War prices began to fall at once, and continued to record succeeding declines and upward movements, the declines being always greater than the rallies. In 1918, on the other hand, there was a decided drop in prices, succeeded by a further rise that carried prices to new high levels.

Declines Much Alike

Allowing for the fundamental differences it is noted that the intensity and scope of the present decline in prices is almost identical with the decline which took place in 1865, immediately at the close of the Civil T War. At that time the rest of the world was pursuing, and had in the main pursued during the war here, a normal course of productivity, and normal course of productivity, and there was no world shortage of materials such as existed in 1918 as a clared payable on Jan. 15, 1921, to stockholders result of the drain of the World War upon the resources of all nations.

This shortage undoubtedly was the LONDON, England-The General cause of continued price increases for ommittee of the Master Cotton Spin- a considerable period after the armi-

PLAN PROGRESSING

Selling Crops at a Fair Price Support Received in South for New Company to Aid Business Abroad Indicates That Corporation Will Be Formed Soon

Special to The Christian Science Monitor

from its Southern News Office ATLANTA, Georgia-That bankers throughout the south are taking kindly moment almost wholly wrapped up in by the heavy subscriptions already cotton. Undoubtedly the problem ap- made and pledged by banks throughout pears to the fellah to be infinitely more the cotton belt. At the recent extraor? important than politics, for with the dinary session of Georgia bankers, not been contemplating purchasing, of 848 Georgia banks subscribed when the price was about what it is counties in the State, 73 were repre-State's total up to \$1,600,000. Louisiana is expected to subscribe at least \$2,000,000 before December 10, when

Mississippi bankers, at a recent spe cial meeting of the Mississippi Bankers ward her quota of \$600,000. More than 100 banks in Arkansas have already subscribed \$325,000 toward that State's quota of \$400,000. Tennessee bankers have also indorsed the proposed company, and L. C. Hume, president of the clearing house, has announced the From Ottawa comes this report: to put any political interest which cooperation of Memphis bankers, who are said to be willing to take at least half of the \$500,000 expected from that State. Morida bankers have also expressed their willingness to subscribe to the capital stock of the new com-

> "Subscriptions to stock in the bank will close on December 10," says Robert F. Maddox, president of the Atlanta National Bank, who is also chairman of the organization committee for the export corporation. "We are confident the minimum capital stock of \$6,000,000 will be over-subscribed," he continues.

> "Just as soon as the stock has been subscribed, steps will be taken to organize the bank, and it will begin to function at the earliest possible moment consistent with safety. Headquarters will be in New Orleans, and before long we hope to see cotton begin to move toward European markets through the assistance of credit extended to the exporters by this new

bank. This big export company, it is expected, will greatly improve markets for southern products and add materially to the prosperity of the entire south. The company will assist the exporter in meeting European conditions, and it will finance the transaction, the exporter receiving his money immediately instead of waiting until the foreign purchaser can pay CAIRO, Egypt-The continued fall for the cotton. This plan relieves the in prices for cotton which is being exporter of the necessity of tying up aggravated by conditions in the United all of his capital in a few shipments, time from the purchaser.

SPANISH CUSTOMS TARIFFS

MADRID, Spain-The Minister of Finance has declared his intention of taking immediate action concerning an increase in customs tariffs on articles of luxury, probably by means of a royal decree, in order to restore the balance of trade which at present is unfavorable. The Permanent Tariff Committee is continuing discussions on the subject of a general revision of tariff rates, but the Minister considers rapid action necessary and will issue provisional orders, which will be enforced until new legislation has been passed by the Cortes.

OREGON BEATEN BY BIG SCORE

University of Southern California Wins Its Football Game at 122. Los Angeles by 21 to 0

ial to The Christian Science Monitor ts Pacific Coast News Offic

LOS ANGELES, California-Univery of Southern California won a cisive football victory over the Unirsity of Oregon Thursday, defeating r northern adversary by a score of to 0. At no time was the outcome doubt. From the first kickoff until whistle called the game to a close. e Trojan warriors had undisputed ossession of the field, showing supety on line, in kicking, in tackling, d in the forward pass.

e game was a forward pass by Quar- the preliminaries for the professional over Oregon's line. This was the third This tourney starts December 6.

time University of Southern California put the ball over their rival's defense

Oregon did not make a single first down during the entire game. She undoubtedly was handicapped by the absence of Capt. W. H. Steers, but even his presence on the team could not have greatly changed the result. Last year Oregon played Harvard on this same field and lost by a very narrow margin of 7 to 6.

> A really delightful exhibition of meeting of the Crystal Palace and Reading teams. On the previous Saturday, Reading had secured a victory over the Palace, who, on that occasion, had been without the services of their star player, Robert McCracken, the Irish international. McCracken was very much in evidence in the return match, and successfuly frustrated many gallant efforts on the part of the opposing left wing. The Palace team played well together as a whole, whilst the Reading men were brilliant amateur international, played left half that the deciding goal was registered. for the visitors, and did some sterling adequate support to their forwards.

orwards on each side showed more reading 6 to 0, 3 to 0, and 3 to 0. than their usual dash. The Millwall Field with a tie to their chedit. The vanguard was particularly dangerous C. R. Morin—2 2 0 1 0 3 1 2 5 0 0 0 ecore was 0 to 0.

WORLD MUSIC THE

"TRISTAN AND ISOLDE"

In English at the Metropolitan, New York

cial to The Christian Science Monitor from its Eastern News Office seph Urban. The music was Arthur Bodanzky. The cast: sic was directed

.....Johannes Sembach rd...........Jeanne Gordon

NEW YORK, New York-Musically, the revival of "Tristan and Isolde" at the Metropolitan Opera House turned ut to be an important event. On the orchestral side the performance was a hree-and-a-half-hour delight, and on he vocal side an afternoon of almost inbroken satisfaction. Mr. Bodanzky, s is the rule when he conducts, nieved such balance of sonority between voices and instruments that both partments were perfectly heard and latzenauer filled the large Metropoliat the same time she met eyery traal requirement of the rôle of

MUSIC NOTES

Cyril Scott, the British composer, on the afternoon of November 20, presenting a program of his own works, sh Opera Company, has come to the setting of Francis Thompson's well turn to classic forms. And in all the music is played apart from the loston Opera House for an indefinite known poem, "The Kingdom of God," cases his melody has an English dramatic action. There are clever or flavor. Of particular interest among chestral effects, it is almost needless. ext week "The Bohemian Girl" will distinctive of the four, the opening the numbers in which Mme. Gauthier to say. The prodigious command of for the soloist and chorus in unison took part was an "Idyllic Fantasy," orchestral technic excites astonishbeing particularly impressive. The for voice, oboe and violoncello. In ment. It must be admitted that there

tone of the instruments, which were program served well to show the also included, so that an instrumental played off stage.

Mme. Birgit Engell, soprano, appeared in Carnegie Hall, New York, phony program. on the afternoon of November 22, with sure, looking for no reward, counting Coenraad V. Bos as her accompanist She sang works in various languages her composers including Gluck, Pergolesi, Caccini, Franck, Lenormand, There was no hint of Japanese acting the English text of H. and F. revised by Sigmund Spacth and cell Cowdrey; Metropolitan Opera New York, afternoon of November 6. The scenic production was by all contributed with a neat feeling. interpretation. She made an especially striking success with a work of Lenormand's, "Quelle souffrance," which surely has been neglected more than it should be by recital perform violin solos, we'l played by W. H. ers. In this work the composer Reed, and a group of amusing achieves an unusual and impressive climax by gradually lifting the melody through a series of planes and making the voice sound for a considerable time in each of its registers in turn, from the lowest at the beginning of a stanza to the highest at the end.

Vasa Prihoda, violinist, made his first appearance in New York at Carnegie Hall on the evening of November 22, with Osta Doubravska playing his piano accompaniments. His program Tartini's "Devil's Trill," Paganini's concerto in D major, Schubert's "Ave Maria" and Kreisler's "Caprice Viennoise," and his playing was all in the familiarly good style of the present renaissance of violin art. It almost seems that the instrument which Stradivarius perfected has at last, after two centuries of more or less obstinacy, yielded to the persuasion technical secrets to them. For the conservatory masters are turning out tity. The American concert circuit evidently is no longer to be at the sole disposal of a few artists, as heretofore; and among those who will push for recognition and find it is undoubtedly Mr. Prihoda.

The Flonzaley Quartet, when it be-

gan its American career 12 years ago. or thereabouts, was-an historically constituted group of chamber music performers. To people who attended its concerts, the quartet was Adolfo Betti's violin, accompanied by three other instruments. But today it is not only Mr. Betti's violin, but also Iwan d'Archambeau's violoncello and Louis Bailly's viola. The only purely accompanying instrument remaining in the combination is Alfred Pochon's violin, which plays the second part from the top in the harmony. The institution has progressed, or changed, in parallel manner with the world before which it has appeared. Whereas formerly the privileged first violin dominated, now the proletariat 'cello asserts its equality and one of the two middle tone strata, the viola, has likewise become insurgent. The second violin alone remains submissive. And Mr. Betti's genius, the same that The Bradford subscription concerts' changes of tone balance.

The seventh program of the Boston ballet "Pétrouchka."

fer in being transferred to a large Respighi's symphonic poem is a case unexpected beauties of melody and dition to our orchestral repertory. Stravinsky's "Pétrouchka" is distinctly music for the theater.

the heavy drill, and great bags of the If we seek for causes for the forma-ence which divine Love has revealed

abounding good, either of health, supply, wisdom, capacity, goodness, or happiness, it is evident that these mous with unlimited good, although is similar bearing in these unlike con-

So long as one has not utilized temptations to false ambition, place and power, been able to rise above be-The Garden Stretches trayal, crucifixion, and the claim of death, then it cannot be said of him that he has risen above the belief of laws of limitation. Even so long as one is not risen out of the claim of life in matter and its apparent denial of infinite Spirit; and this exit must be made gradually and gently through spiritual understanding and good works that help others in the way of Christ.

> Having great material possessions is no manifestation of conscious, limitlesson of the rich young man, and that of the rich man and Lazarus, by Jesus' refusal of the kingdoms of the world. and his saying, "My kingdom is not of this world." In Science, it is seen that divine Love is the boundless source of well-being, that Mind is always available supply for any right purpose, for Mind is substance. Notwithstanding what form matter seems to take, it is

not substance, and it cannot procure the heavenly gifts-wholeness and the joys of Spirit. Selfishness is one of the always been for good, even though tals have use of is for their stewardchoose the best use for the means at recommendation, "And God is able to make all grace abound toward you: that ye, always having all sufficiency In the world's many methods of in all things, may abound to every good

Walking and Music

Christian Science shows the way of generally adumbrate music is at once demonstration, "Science and Health the distinction and the pride, the duty demonstration, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, being the key to the demonstration of Truth, and the in their range of melody and Protean method it reveals proves good to be in their variety of tone-color. There is boundless and present every instant surely some natural kinship between as infinite Mind and its infinite mani- walking and music; the musical terms festation. Wherever, therefore, a want -andante, movement, accompaniment seems present, the need is for more -are full of suggestive metaphor; and understanding of Truth and its appli- the sacred symbol of both arts is the cation to human affairs. The wise wooden stick which marks the strides course, accordingly, is to utilize, of the walker and pulsates to the

of the Bible and Mrs. Eddy's writings. kinship is rhythm. The simple beat of The most obvious ground for this When Paul was explaining that the the foot on the ground, with the natonly foundation for spiritual building ural swing of the body above it, sugwas the Christ, the spiritual idea, or Truth, he included the reminder that it was foolishness to seek another two, one, two" without fitting a melody foundation or basis of wisdom, either to it; it is even more difficult to hear in person or material possessions, void a melody played or sung when walking of reality; and he concluded, "All without dropping instinctively into its things are yours; whether Paul, or rhythm. A London crowd, that most Apollos, or Cephas, or the world, or apathetic of masses, begins to march life, or death, or things present, or in unison when a barrel-organ strikes things to come; all are yours; and ye are Christ's; and Christ is God's."
This is by way of proclaiming the necessity for each one proving man's relation to shounding good God and relation to abounding good, God, and over a tune (which happens to all of to the right idea of his fellow men, us sometimes), there is nothing more also his dominion over the seeming satisfying than to walk past the band reversal of good. The knowledge of or gramophone from whence it issues Truth leads to the demonstration of at a step cutting clean across its omnipotent and omnipresent Life and rhythm. Had the Sirens lived on land, its abounding harmony, counteracting of the and death and discord and the "sting of in his ears; he could have waited till they began their incantation (in A flat, death," sin. Hence every one can three-four time, sixty bars to the minmaintain vital connections with good, ute, lusingando), and then walked by -which derives nothing from the op- at a brisk step, matched to a breezy

The Question of Class Consciousness

LORD COWDRAY, a British peer with a wide experience of labor problems in many parts of the world, delivering his recent rectorial address in Aberdeen University, laid it down that the question of the hour in all industrial matters was the discovery of the ideal wage. For the reason given, Lord Cowdray is an ill man to differ from, but the fact remains that, just because the world continues to spin, the fixing of an ideal wage, in anything like permanency, must remain impossible. It may be as well for Capital to face the facts now as later. The day of wages as an accepted economic fundamental is over. Labor is not out for fixing an ideal wage, it is out for its share of the profits of industry. No doubt, on its way to the millennium, it will take advantage of Lord Cowdray's and any one else's bridges, but as bridges, and as bridges only. And perhaps in this way alone can the problem of increased production be solved, a problem which every authority insists is a preliminary to economic stability, but which Labor doggedly resists.

The dominant fear of Labor is that any increased output will have the effect of swelling the already excessive toll taken by Capital, while at the same time enlarging the area of unemployment. As a defense against this, it has supported the labor restrictions of the trades-union, and adopted the expedient known as "ca' canny." These, however, are defensive works. Its great offensive has always taken the shape of the demand for more wages. So long as this demand was sufficiently insignificant not seriously to increase prices, the resulting vicious circle was not developed as an object lesson. But the time came when certain resulting facts were forced upon the attention of the worker. First, an increase in wages meant a corresponding increase in the cost of production, which increase he manufacturer met by raising his prices. Consequently he worker being, in the majority of cases, the chief purchaser, he found himself paying for his own rise in wages by his increased cost of living. Nor did the matter end here. Every increase in the cost, of manufactures, especially in the cost of luxuries, meant a proportionate decrease of purchasers, and this forced a corresponding decrease in production, and so in employment. The worker might endeavor to meet this by "ca' canny," but the remedy, being out of Principle, could only increase the cost of production further, and so aggravate the condition it was intended to cure.

When Labor made this simple discovery it began to hange its method. Its new ideals were expressed in terms of Syndicalism. But here once more it found itself amidst submerged rocks. It was all very well, as so devoted a Labor leader as Philip Snowden pointed out, in England, to propose to take over the mines, the factories, and the railways, but it required a knowledge of organication and an educated intelligence to run these, which the workers did not possess. In England, in France, and in the United States, the workers were too conservative to be rushed into undigested revolutionary schemes. But in Russia and, in a much less degree, in Italy, there was not the same restraint. The managerial staff was shoulred aside, and either dislocation or collapse followed. In Italy it was dislocation. In Russia the "great experiment" went too far to be checked, and the end was collapse. Even Russia has now discovered that a country annot survive without its intelligence, and the hated 'black coats" are being recalled to their posts. The crude attempt to enjoy the fruits of capitalism, while destroying Capital, has proved as practical as killing the goose which lays the golden egg.

Recognizing this, Labor in the West has sought another solution of the problem. It has determined by constitutional action to gain control of government, and then by revolutionary legislation, revolutionary that is to say in the sense of revolutionizing the laws, to bring about egally entirely different social and economic conditions. The progress of this campaign is, in certain countries, England for example, much more advanced than the ordinary person thinks. The trades-unions are no longer out for higher wages, though they may take these in their tride, they are out for an entirely new distribution of the fruits of labor, and they are not particularly interested by what means this is reached. That is why so deep a thinker as Lord Haldane is preaching the abolition of class consciousness, which, he points out, contrary to some people's hopes, can only be got rid of by getting rid of the classes. Labor, he points out, is in a huge majority, and Labor is in the dangerous temper of a man who feels that he is dispossessed. Revolutions in the past, history rightly insists, were produced not by what was, but by what had been. Louis XVI, in other words, paid the penalty not of his own misdemeanors, but of those of Louis XIV and Père Duchesne and of Louis XV and the Abbé Dubois. It was precisely the same in the case of Nicholas II. Therefore, Lord Haldane preaches the gospel of service, convinced that if the democracy sees that the government is in earnest it will rally to its support rather than build barricades.

The worker is dissatisfied, Lord Haldane warns his audience, not because he is working, but because he is working without any control over his labor. He feels that he has no real say in an economic state organized on the basis of Capital. In a sense, Lord Haldane dmits this is true, and it is this very element of truth on which class consciousness feeds. Class consciousness, therefore, is the enemy which holds the field, and against class consciousness the wise statesman should direct his attack. The attack, however, must be planned not with a mere view to destruction, but with the idea of constructing a new system. The worker is rebelling not against Capital qua Capital, but against the domination of Capital. To destroy Capital outright is simply to destroy the state with it, as the Russian experiment has shown. But it is not necessary to do this. It is only

necessary to destroy the domination of Capital by a new system which shall distribute the profits according to merit. In this way you substitute service for domination; and in this way, in the opinion of Lord Haldane, the bridge may be built by which men can pass, in peaceable revolution, from the old order to the new.

Many political engineers will draw the plans of such bridges during the next few years. But Lord Haldane is no ordinary engineer, and his warning deserves much more than ordinary attention. That the spread of class consciousness is the great dynamic force behind the present world unrest is a postulate that leads to little disagreement. The question is how to overcome it so that reasonable satisfaction may be afforded to all. As a suggestion to a means of affording such satisfaction the advice of Lord Haldane may not be exactly new, but it deserves attention as coming from a man who does not speak lightly, but measures every word.

Criticism and the Calculating Machine

It is not necessary to hold a brief for the literary style of the President of the United States in order to form a very decided opinion as to the tone, temper, and ability displayed in Dr. Hale's attack, upon it. There was a time when Dr. Hale was amongst the most enthusiastic of Mr. Wilson's admirers. He even constituted himself Mr. Wilson's biographer. But that was in the good old days when he believed the President to be smiling upon the Kaiser. Today all this is changed. The panegyrist is become the satirist. To tell the truth, Dr. Hale has made the change from extreme to extreme with an agility Polycarp regarded as impossible, and it is only necessary to turn to his book to be assured of this. The pity for his own reputation as a critic is that he did not make the discovery earlier.

The critical method of Dr. Hale is, indeed, mathematical rather than exegetical. Given a spacious leisure and a knowledge of the multiplication tables, it might be employed elsewhere with remarkable results. He has enumerated adjectives and verbs, he has classified superlatives, he has counted the intensifications, and he has catalogued the "I am sures," and the "I once mores." This only gives, it is true, a faint idea of his industry, but the attenuated results derivable from it may be studied in one of his own reverberating discoveries. By diligent counting, Dr. Hale has unearthed a passage in Mr. Wilson's writings which yields precisely one verb and thirty adjectives to one hundred and eight words. Instantly he applies the critical enumerating attachment to the pages of some twenty prominent writers, with the precise result which might have been looked for by so uncritical a person as the general reader. Now, observe Dr. Hale's method. He selects a particular passage from Mr. Wilson's writings and counts it out, word by word, against passages, of the same length, taken from numerically identical pages of his assorted competitors, with the result predestined to the experiment. But supposing any person desirous of proving long sentences to be an enormity, the perfection and simplicity of Dr. Hale's method will become instantly apparent. You select the longest you can find of Ruskin's titanic sentences. Then you turn to, say, page 150 of Macaulay's History and of a dozen other books, and take the first complete sentence on each page. The result you set out to attain, and knew you would attain before you set out, is attained-Q. E. D. Here you have literary criticism after the very method of Euclid.

Nor is Dr. Hale any happier when he assumes the gown of the grammarian, for he is evidently totally unacquainted with the dictum of a famous authority that "a real grammarian" is "one who does not lay down rules only, but is anxious to ascertain on what usages are founded." He is very much disturbed at the habit Mr. Wilson sometimes indulges of ending a sentence with a preposition. One trembles to think what would be revealed if the books of the great writers were subjected to the mathematical test on this point. But, as a matter of fact, usage has long ago grabbed the preposition as part of the verb, so that one of the real grammarians, writing of his own habit of breaking this rule, adds slyly, "I know, in saying this, that I am at variance with the rules taught at very respectable institutions for enabling young ladies to talk unlike their elders; but this I cannot help; and I fear this is an offense of which I have been, and yet may be, very often guilty."

Then again, Dr. Hale is very much displeased with Mr. Wilson for his use of that terrible abbreviation, "very pleased." No doubt the rule is on the Doctor's side, but think of all the distinguished offenders, if time and the calculating machine were only employed, who would assuredly have to do penance with the President. Half a century ago all that one of the great grammarians would say for the "much" was that he preferred it as more conformable to usage. Like every other victory of usage, it is to be suspected that that of "very pleased" over "very much pleased" is complete today.

It would not do, however, to take Dr. Hale too seriously. He is obviously almost as provoked with the President as was the gentleman who wrote to Dean Alford concerning his admiration for the grammar of the Bible and Shakespeare. The difference is that the Dean unkindly gave publicity to the letter of his correspondent, whilst Dr. Hale has given away himself. "When I was at school," explained the critic in question, "it was the habit of my tutor to give his class specimens of bad English for correction. You will be surprised to hear that those specimens were chiefly from Scripture. They were given with all reverence, nevertheless. It was because the readiest examples were to be had from the Bible, that any were taken from that source at all. Again, Shakespeare is held up by you as a pattern to modern grammarians. With all respect, I cannot understand how any man, with the education you must have received, could venture to insinuate such a dogma as this. Any one, with even the insufficient light which Murray aifords, may detect numberless errors in every play which Shakespeare has written." Without doing anything so foolish as to compare the style of Mr. Wilson with that

of the Authorized Version or of Shakespeare, it may perhaps be legitimate to take leave of the lucubrations of Dr. Hale with the informing sentence in which the Dean summed up the effort of his critic—"This is rich indeed."

Art Hospitality

THE success of C. R. W. Nevinson's show of pictures in New York, following the exhibitions of Ambrose McEvoy and Alfred Wolmark—all Englishmen—is a reminder of the hospitality of the American art public to British artists. The gates are ever open. At this moment the Garden Club of America is arranging to welcome, in New York, the flower pictures by Frank Galsworthy, John Galsworthy's cousin, and a member of the Royal Horticultural Society of England. This is as it should be. Art has no frontier, and the more British and American artists mingle, the better it will be for the confraternity of the English-speaking peoples.

America's hospitality to foreign art is of long standing. The Barbizon and Impressionist painters found their chief market across the Atlantic, and if the purchases were often made through the ears, not through the eyes, what else could be expected from men who had advanced from poverty to riches, and who bought names because a busy life in the pursuit of commerce had not given them time to study the subtleties of vision, and the nuances of technique. But the days when one buyer purchased twenty Monets, because Monet was the name of the moment, have passed: also the days when two rich Americans in Paris visited Cazin in his studio and bought everything he had for cash. Today a growing number of American collectors are buying nothing but American pictures. An authority calculates that there are at least forty such collectors. In art, the time prophesied by Emerson in "The American Scholar" has, in part, arrived. It will quite arrive when the authorities make up their minds to found a gallery of "Contemporary American Arts and Crafts," for which all artists and craftsmen are waiting, and for which the most ardent are appealing in letters to the press.

England, having a much longer art tradition, is naturally ahead of America in this respect. For years she has had in the Tate Gallery a national gallery of British art, and she is now building a gallery of "Contemporary Foreign Art," in which American pictures will have an important place. But for some reason or another (is it the natural modesty of the American artist?), pictures painted in America have not made much headway in London. Why do not American artists follow the example of Messrs. Nevinson, McEvoy and Wolmark, to name but three, and take their pictures over to London? With the exception of the collection gathered together by Mr. Reisinger, and shown at Shepherds Bush a few years ago, untraveled Londoners have had hardly any opportunity of seeing pictures painted in America.

This is not England's fault. She is, and always has been, most hospitable to the artists of other countries, and London would welcome the idea, which has already been suggested, that the opening of the gallery of "Contemporary Foreign Art," at Milbank, should be signalized by the exhibition of a collection of American contemporary

In the past England has done all she could to honor and popularize American artists. She has opened her arms to the eminent Americans who have elected to settle in London, and given them the highest art honors at her disposal (Sargent was offered the presidentship of the Royal Academy), and has poured money into their pockets. It is only necessary to mention the names of J. S. Sargent, R. A., J. J. Shannon, R. A., Edwin Abbey, R. A., Mark Fisher, R. A. And although Whistler never became a Royal Academician (he did not want to be one) it was in England he lived, and it was in England that he found most of his few but fit great admirers.

When the gallery of "Contemporary American Arts and Crafts" is founded is it too much to hope that there will be an interchange of exhibitions between England and America, and an interchange of visiting artists and craftsmen who will acquaint one another with their experiences and ideals, accompanied by the hospitality that men of letters of the two countries have found so pleasant and profitable?

Lengthening Lamplit Hours

ALL at once, it seems, in the northern latitudes of the United States, and before the realization comes that the fading greens in the pasture lot and the falling leaves in groves and forests have again signaled the approach of winter, the earlier twilight hour, followed almost suddenly by deepening shadows, brings the pleasant promise of long evenings beside the library table or the cheery study lamp. Possibly some have failed to take note of a striking characteristic of those people who have always made their homes in those sections of the country where the divisions between the four seasons of the year are most definitely marked. This characteristic seems to be that they most cordially welcome each of these seasonal changes as they occur and recur, much as one would greet an old and tried friend who has been absent on a journey. Spring and summer, autumn and winter, come and go in their allotted times, and each receives its cordial greeting and its respectful adieu. No matter with what haste and unseemly confusion winter may announce its advent; no matter how it may have lingered and worn out its welcome; no matter how the cheering colors and breezes of spring may be missed, or how satisfying and restful the long, dreamy days of summer, the code of etiquette, established by custom, if not by necessity, compels the speeding of the parting and the greeting of the com-

And so it is that in the first weeks after the sun passes over the line on its annual journey to carry summer to the lands far down beyond the equator, when the promise of approaching winter is assured, and when the gardens and the orchards have yielded their last contributions to the season's stores, there comes a satisfying realization that the long lamplit evenings, the pleasant hours for quiet study and uninterrupted reading, have again arrived. They bring their memories, some glad and some sad, but,

more than this, they bring their own new opportunities. Just now there are a thousand and one things to be done in preparation for the approaching holiday season. There are letters to be written, and long letters too, to the absent ones, and these must be sent on their way, some perhaps half round the world. There are a half dozen books and a score of magazines carefully laid aside, perhaps, to be read and enjoyed at leisure. And there are indoor games to be played, of course, and school lessons to be mastered, to say nothing of the preparations for skating and coasting, almost unfailing accompaniments of the vacation period.

One permitted for the first time to observe the flexible routine of a winter evening in New England, for instance, or in any section of the great north country of the United States or Canada, could not fail to be convinced that it indicates and suggests nothing of idleness. It reflects nothing of the long period of enforced inactivity of the arctic and antarctic regions, nor yet of the siesta seasons of the tropics. Seasonal activities, as viewed in New England in winter, are as intense, though of a different kind, as those of the summer or spring. Just now, as one recalls the long evenings of other years, the shaded table lamp, the toy-strewn floor, the popping corn, the halfempty apple basket, the opened book held in a tender hand, the northeast wind beating insistently against closed shutters, the jingle of passing sleigh bells, the tick of the clock as it marks the seconds and the hours, one cannot fail to extend a welcoming hand to the evening hours, the lengthening lamplit hours, of the returning winter. They bring, as their predecessors have brought, always, to some one, tender memories, perhaps, but always new joys and new opportunities.

Editorial Notes

Bolshevism is bending the knee to capitalism. This is a rather blunt way of putting it, but not less blunt than the latest Soviet decree itself, a decree that admits, without the slightest compunction, the need for foreign capital to exploit the natural riches of Russia. There was a time, and it can be measured back in months, when the word "capital" brought a hiss and a shout of derision from the mob in the streets of Moscow. The Communist looked upon the capitalist as his bitter enemy, and made it his business to drive moneyed interests to cover, if not into exile. Time has brought changes. Bolshevism, struggling to assert itself, has failed to supply the wants of Russia, and, apparently, can no longer stand alone. It opens the doors to capital, and, in doing so, begins a momentous chapter in the history of the country, a chapter over which other nations, in which the agents of Lenine and Trotzky have got a foothold, would do well to ponder.

Dr. Bedrich Stepanek, who is to be the new Tzecho-Slovakian Minister Plenipotentiary and Envoy Extraordinary at Washington, was Chief of the Ministry of Foreign Affairs at Prague during the Paris Peace Conference. He made a spectacular flight from Austria across the Adriatic in a small open boat during the war, and was actively engaged in preparing the Tzech revolution against the dual monarchy. He was for some time the right hand of Dr. Benes in the Tzech Foreign Office. He follows the brilliant young diplomatist, Jan G. Masaryk, who has brought to a high plane the reputation of Tzecho-Slovakia in the estimation of the American people. At home the name of Masaryk has come to be something like a household word. And no wonder, with Thomas G. Masaryk steering the political bark of the nation, and his daughter Alice firmly controlling the social and educational machine!

It is a striking idea to raise an enduring memorial to the founder of modern Zionism by the reafforestation of much-denuded Palestine. It seems to measure up to the bigness of Dr. Herzl's work, though it stands out strikingly against the background of modesty, amounting to shyness, which was such a salient characteristic of that great man. Theodor Herzl always gave the impression of being happiest when out of the limelight's glare. He was latterly literary editor of the Viennese "Neue Freie Press," and his workroom in his Vienna home was a quiet retreat as much given up to his estimable play-writing as to the organization of one of the greatest movements of our times.

Among all the proposed solutions for the housing shortage, it would perhaps be difficult to find one more novel than that of the carpenter in an English town who set his wits and his tools to work together and constructed a cozy little bungalow on wheels in which he and his wife have taken up their abode. It is a clever piece of work apparently containing all of the necessary comforts of home arranged in the most compact fashion. To be sure, there is not much space available for books and music, but that is a deficit that can be made up, for such a bungalow may be rolled to a position within easy reach of library or concert hall.

ONE is almost inclined to label as a piece of poetic justice the fact that Connecticut, the State in which women have labored for their enfranchisement so long and against such determined opposition, on the part of politicians who apparently feared the end of their regime, should lead the nation in the number of women elected to its state Legislature. Connecticut's election of five women legislators, one of whom bears the title "Reverend" before her name, leads one to look hopefully toward that State for the inauguration of at least some of those reforms which thoughtful women, and men, too, of the United States have long been advocating.

In an article nearly two columns in length, a New York newspaper writer decides that there are no statistics that will give credence to the assertion that the use of narcotic drugs is replacing that of liquor. The article makes it clear in the first two paragraphs that no conclusive facts have been obtainable. The headline above it, however, perhaps written for the running reader and the man who reads over the other man's shoulder, announces: "Whisky Habit Gives Place to Narcotic Drugs."
